# Clearcoats

## 40-40 Universal Clear

baslac® 40-40 Universal Clear offers all the key performance properties you need to achieve the ultimate finish. Featuring perfect durability, high gloss retention and good leveling properties, the baslac® clearcoat system offers an easy-to-use quality system.

## 40-10 Panel Clear

baslac® 40-10 Panel Clear is a fast-drying clearcoat that can be used for spot and panel repairs. With the mixing ratio of 2:1 +10%, it can be adjusted with different hardeners and reducers to suit user's individual needs.

## 40-510 Ambient Clear

baslac® 40-510 Ambient Clear is a unique product with quick air-drying capabilities. With BASF backed product quality, easy application, excellent gloss level combined with a short air-drying time, bodyshops can double their production. Polishable after 90 minutes air-dry or 5 minutes drying at 60°C offers a significant benefit for smart repairs.

# Basecoat

## baslac 35

baslac® 35 Line basecoat system is available in solid, metallic and pearl shades. It is easy to use and stands out with excellent covering properties and color accuracy. The high solid, high pigment system allows easy application and quick drying. baslac basecoat provides the bodyshop with a range of benefits with proven technology and quality, high color accuracy, 5 years shelf life, strong hiding power and 140,000+ color formulations.

# Topcoat

## baslac 30

baslac® 30 2K topcoat system provides the user with high efficiency through excellent hiding power and low material consumption. With different Hardeners and Reducers in the portfolio, the user can adjust the product to respective temperature and object size making baslac 30 a very efficient and flexible system.

# Undercoats

## 2K Primerfiller 20-24 / 20-34 / 20-94

baslac® 2K Primerfiller system consists of three colors – grey, white & black, providing an option to be mixed to obtain different grey shades. It offers users a dependable product with a quick-drying time with good sanding properties.

## 2K Wet-on-Wet Primerfiller 20-35 / 20-95

baslac® 20-35/95 is a non-sanding surfacer with a fast-drying time of 20 minutes before paint application. It has good adhesion properties and can be applied directly on e-coat without sanding. This product can be overcoated for up to 5 days without intermediate sanding.

## 1K Plastic Primer 21-10

baslac® 21-10 is an easy-to-use 1K Plastic Primer. With easy and safe spraying properties and a short flash-off time of 15 minutes at 20°C, it is applied beneath baslac undercoats that require an adhesion promoter.

## 2K Primerfiller EP 25-30

baslac® 25-30 2K Epoxy Primerfiller is a high solid and multipurpose primerfiller. When used over bare steel, aluminium, zinc-coated or galvanized metals, 25-30 offers excellent adhesion and corrosion protection.

## 2K Universal Bodyfiller 12-20

baslac® 12-20 2K Universal Bodyfiller provides the user with easy application, fast drying and easy sanding properties. It can be used for all types of repairs on steel, galvanized steel and aluminium, making it the best solution for all repairs in a bodyshop.

## 2K Washprimer 27-10

baslac® 27-10 2K Washprimer is an adhesion primer which can be used on various substrates like aluminium, steel and galvanized steel. It offers good anti-corrosive properties on bare metal and excellent sanding properties.

# Additives

## 2K Hardeners 50-15 / 50-20 / 50-30

baslac® 2K Hardeners 50-15 (Fast), 50-20 (Normal) and 50-30 (Slow) can be used with primers, topcoats and clearcoats. It can be mixed to the user needs based on temperature and object size.

## Reducer 60-05 / 60-10 / 60-20 / 60-30 / 60-40

baslac® reducers can be adjusted to the user's needs based on the temperature and object size to be painted.

## Blending Reducer 65-10

baslac® 65-10 is a spot blender that is used to smooth out a clearcoat blend edge for making an invisible repair.

## Cleaning Solvents 70-10 / 70-20

baslac® 70-10 silicon remover can be used for metal cleaning to avoid contaminations during the entire paint job. baslac 70-20 is designed for cleaning all kinds of plastic substrates.
